## Lions Club Plans New Features at Ice Carnival

The Carbon Lions Club is once again sponsoring the annual Ice Carnival at the local rink and the date for the gala affair has been set at Friday, February 23. The various committees needed have been set up and are going ahead with the many details involved.

The Carnival Queen contest is one of the attractions of the carnival. Three local girls and one entry from Drumheller are vying for the top honors and are now busy selling queen tickets. The candidates this year are: Evone Foster, sponsored by the Carbon Legion; Darleen Hecktor sponsored by the Carbon Farmers' Union Local; Vivian Sigmund, backed by the Carbon Junior Grain Club; and Arlene Weymark of Drumheller, who is conducting her own campaign.

The program this year will include a number of new features including chuckwagon races on the ice. Details of the new events will be announced later.

Proceeds of the carnival will be used to defray expenses of operating the rink.

The Carbon Peewees hockey team was swamped by the Three Hills Peewees by an 12-0 score in a game played here Tuesday. Three Hills scored 11 goals in the first period, one in the second and were held scoreless in the third.

## Westinghouse Food Mixer

### It Mixes, It Beats, It Blends

so much better because years of engineering research plus hours of kitchen testing by homemakers combine to make this the portable household mixer that women want.

The compact, precision-built motor is strong and powerful, full one-eighth h.p. load capacity assures full power for any kitchen mixing requirement. All bearings are packed with sealed-in grease for long-life lubrication. Never requires oiling. Not a chance for oil drip.

## A Long Friendship

DURING THE PAST HUNDRED YEARS there have been many indications of the close friendship between Canada and the United States and the thousands of miles of undefended border between the two countries has stood as an example to the world of what can be accomplished in the way of international friendship and co-operation. It is true that we possess a common language and that many of the people of both countries have the same racial and cultural backgrounds. However, it must be remembered that the two countries were not always at peace, and that some of the most bitter conflicts in history have been civil wars, which was the nature of the early struggles between the American people and ourselves.

### An Example Of Tolerance

Keeping the peace and erasing the bitterness which once existed between the two nations has been a fine example of the genuine desire of two nations to live side by side in enduring peace. One of the latest manifestations of this friendship took place recently in Washington, D.C., when a window in honor of Canada was dedicated in St. Alban's Cathedral in that city. The great window, which is made of multi-colored stained glass, stands between windows dedicated to the United Kingdom and to South America, and it depicts scenes from the history of Canada, the central figure being St. Lawrence. The window will stand as a reminder to the many people who will visit the cathedral in the years to come, of the long friendship between the United States and Canada.

### Benefits For Both Nations

Lies in the fact that Canada, through her close ties with the United Kingdom and her firm friendship with the United States has been able, on numerous occasions to act as a liaison between those two countries in the settling of important affairs. For many years, there have been groups in both the United States and Canada who have suggested that at some time Canada may be absorbed by her larger and more powerful neighbor but as time goes on there are no indications of any trend of this kind and it is more likely that the two countries will continue for many years to come to live in the same manner as they have for the last century.

About 10 per cent. of all marriages in America remain childless.

### Something New! Whitefish Livers

North Saskatchewan gourmets think they have something pretty tasty, and perhaps the "outside" may think so, too, shortly. The addition to the palate ticklers is whitefish livers fried in butter and served sizzling hot. D. F. Corney, manager of the Saskatchewan fish marketing board, explains that while fish livers aren't new in themselves, whitefish livers are. They aren't produced on a commercial basis yet, but experiments for wholesale extraction are underway. Success might mean export to the U.S. market.

The "great African rift" cuts across Asia and down into Africa for almost one-sixth of the circumference of the earth.

### THE TILLERS

—By Les Carroll

—Central Press Canadian.

**FOUND \$4,500**—When she picked up a package of "butter" at a Toronto grocery store, Mrs. M. Lawrie thought it was wrapped more thoroughly than other packages she had bought. When she unwrapped it at home, out fell \$4,500, money taken from the store till and wrapped by a sales clerk. Mrs. Lawrie who would have liked to buy a house but "couldn't get a kick out of keeping money acquired that way," returned the money, received \$200 reward.

## Gold Mining Hits New High

EDMONTON.—Gold mining in northwest Canada hit a new production high during 1950 despite the current gold depression, L. E. Drummond, secretary-general of the Alberta and Northwest Chamber of Mines, said.

Forecasting continued development of northern mining, Mr. Drummond stated that production problems have been partly eased in the north by the Emergency Mining Assistance Act.

### Funny and Otherwise

"So you're a young man with both feet on the ground eh? What do you do for a living?" "I take orders from a man with both feet on a desk."

In a night club, a dizzy blonde snuggled up to her escort.

"How about giving me a diamond bracelet?" she murmured, holding out her arm to envisage the effect. "My dear," replied her friend, "extenuating circumstances—force me to preclude you from such a bauble of extravagance."

"I don't get it," said the girl in bewilderment.

"That's just what I said!" came the grim reply.

A boy at school, when asked to describe a kitten, said:

A kitten rushes like mad at nothing whatever—and stops before it gets there.

A journalist rang up the Central Office of Information to check some facts about the import of salmon. "I'm afraid they've given you the wrong extension," said a young man's voice, very cultivated but very pleasant, and very sad indeed. "I only deal with white fish."

"My wife says that if I die she will remain a widow."

"Evidently she thinks there's not another man like you."

"No, she's afraid there is."

An epileptic dropped in a fit on the street and was taken to a hospital. Upon removing his coat there was found pinned to his waistcoat a slip of paper on which was written:

"This is to inform the house-surgeon this is just a case of plain fits; not appendicitis. My appendix has already been removed twice."

"So you've broken off your engagement. You once told me that your girl was the apple of your eye."

"I know I did. But she's decided to be another fellow's peach."

"Whatever's come over your husband lately, Mrs. Raggleson?" asked Mrs. Raggleson, of her neighbor. "He does nothin' but sit an' brood on the doorstep with his chin in his 'ands."

"He ain't brooding," replied Mrs. Raggleson. "He's practising for the local chess tournament."

Tramp: "Is your husband at home?"

Housewife (resourcefully): "Well, if he's finished his revolver practice, he'll be in the garden playing with the bulldog. Do you want to see him?"

2015

## Manitoba Mining Shows Big Gain During Past Year

WINNIPEG.—Manitoba mining production jumped 32.1 per cent. in 1950 and grossed an estimated \$31,500,000, resources minister J. S. McAdam said in a year-end report.

At the same time, the search for oil and natural gas in the province was "much more intensive than in any previous period." (An oil "show" was made several weeks ago near Melita in southwestern Manitoba but its commercial possibilities have yet to be determined.)

The minister also reported that the market value of furs produced in Manitoba in 1950 rose 24 per cent. to \$3,170,970. Hydro-electric power production was up 15 per cent.

Other points in the minister's report:

1. Forest-fire damage totalled only \$4,920 in 1950 as compared with nearly \$25,000 in 1949.

2. Commercial fishing fell off, with 29,500,000 pounds of fish valued at

## Prairie Woman Printer Enters City Composing Room

VANCOUVER.—One of the last of the men's strongholds, a newspaper composing room, has been invaded by women here.

Mrs. Charlotte Maitland, an all-round newspaper woman, is working among fifty men in the composing room of the Vancouver Sun. One of the few female linotypists in Canada, she began her career when she left high school to set type in Hartney, Man.

Three years later she moved to another weekly newspaper at Souris, Man., and eight years later retired in favor of marriage. Now the shortage of help finds her back among the machines. She came here after the death of her husband.

\$4,800,000 harvested in 1950 as compared with 31,500,000 pounds valued at \$5,500,000 in 1949.

3. The value of forestry products for the year was \$13,500,000, down \$700,000 from the previous year.

You will be delighted with this fragrant tea

No messy mixing bowls . . . no dishes to wash . . . no waste of time or margarine! Be sure to get Blue Bonnet in the amazing new Yellow Quik bag!

Also available in regular style package with color wafer.

# Mao Tse-Tung And Chu Teh

Mightiest War Lords Since Days Of Genghis Khan

**CHU TEH**  
By SANFORD MARKEY  
(CPC Correspondent)

Over Asia's war-clouded skies  
shine two of communism's brightest  
Red stars, Mao Tse-tung and Chu  
Teh.

For 25 years, the two directed  
what seemed to be the hopeless desti-  
nies of the Chinese Communists;  
Mao, the political and economic  
forces, and Chu, the military side.

They once lived in caves as men  
hunted by the huge military machine  
of their former colleague, Chiang  
Kai-shek. Today, Mao lives in the  
palatial grounds of Peiping's Forbid-  
den City and directs the lives of 450  
million Chinese, while Chu commands  
the five-million-man Chinese army  
that threatens to push the United  
Nations' forces out of Korea.

Almost 40 years ago, Mao, then 19,  
rebelled against the forces that kept  
the peasants of his native Changsha  
in Hunan province deep in the mires  
of poverty.

Despite the fact that his father  
was a prosperous farmer, Mao em-  
braced the philosophy of Marxism.

By 1921, he had become an active  
organizer who, along with some  
friends, launched the Communist  
party in Shanghai. Three years later,  
he directed the peasant revolt in  
Hunan.

Mao's active leadership brought  
him into close contact with another  
young dynamic Chinese leader,

Chiang Kai-shek, and in 1926 the two  
were closely allied in uniting South  
China into a strong, modern unit.

Within a year, however, Chiang  
broke with the Communists rather  
than submerge his views to theirs,  
and as leader of the opposing Kuomintang,  
he waged war against the  
Kremlin-controlled Communists who  
fled to join Mao.

Among those to join with Mao was  
Chu Teh. The duo led their followers  
from South China to Shensi province  
in the northwest. It was a 6,000-  
mile retreat over 12 provinces, across  
18 mountain ranges and 24 rivers.  
They were constantly under attack  
by Chiang's forces.

When "The Long March" started,  
there were 90,000 Red soldiers. Only  
20,000 survived the 368-day retreat  
that now forms one of the "glorious  
pages" in Mao's path of power.

Once entrenched in Yenan valley,  
in 1935, Mao initiated his Communi-  
nist theories of agrarian and political  
reform that were eventually to pave  
the way for his ascendancy as the  
number one man in China.

**CHIANG KAI-SHEK**  
—Central Press Canadian Photos.

Taller (5 feet 8 inches) and heavier  
(around 200 pounds) than the average  
Chinese, Mao is described as a  
man "with a sense of humor, and  
a high-pitched voice that is seldom  
raised above the usual speaking  
tone." His face and hands are de-  
scribed as "almost feminine and sensi-  
tive."

Mao has had four wives. When  
he lived in Yenan province his sum-  
mer home was a hut; his winter  
home a cave which he changed regu-  
larly for fear of assassination. A  
heavy smoker, Mao tended his own  
tobacco patch.

Mao has spent little time outside  
of China. In his youth he visited  
Shanghai, and more recently, he vis-  
ited Moscow; the latter a two-month  
pilgrimage made early last year after  
he had conquered China. He has  
never visited any of the countries of  
the west.

Mao's military commander, Chu  
Teh, was, in the early 20's a war-  
lord who lived in Oriental splendor,  
engaged in opium smoking and trad-  
ed concubines.

By 1923 however, Chu experienced  
moral awakening, sent his harem  
away, and broke himself of the opium  
habit by sailing up and down the

**MAO TSE-TUNG**

Yangtze river as a crew member of  
a British steamer where the drug  
was not available.

In 1927, he organized a peasant  
army and subsequently joined with  
Mao to lead the fight against Chiang  
along the path of "The Long March".  
Chu's battles with Chiang's forces  
reached a climax when he chased the  
Nationalists off the mainland and  
onto Formosa.

Unlike Mao, Chu has travelled.  
He went to France and Germany as well  
as to Russia. He spent a consider-  
able amount of time in Shanghai  
where he met many westerners.

Both men have hitched their fates  
to the political fortunes of the  
Kremlin and for the hour their Red  
stars are high on the Asian horizon.

## Letters To Family Allowance Office Make Good Reading

"You have changed my little boy  
to a little girl. Will it make any  
difference?"

This was one of the problems tossed  
at the family allowances division  
of the national health and welfare  
department.

On another occasion the division  
was edified to learn that "in accord-  
ance with your instructions I have  
given birth to twins."

Then there was the correspondent  
who took exception to the perforating  
machine employed on family al-  
lowance cheques: "Our cheque always  
comes full of holes. Have you got  
motifs in your office?"

That is not the only trouble about  
the cheques. A correspondent wrote  
in some agitation: "The baby chewed  
up half of our last family allowance  
cheque. Can I now get a new cheque  
to pay the doctor?"

Other samples from the divisional  
files—the more published ones:

"Sir: I am forwarding my mar-  
riage certificate and my two chil-  
dren, one of which is a mistake, as  
you can see."

"Please send my money at once  
as I need it badly. I have fallen in-  
to error with the landlady."

"I am writing to say that my baby  
was born two years old. When do  
I get the money?"

"In answer to your letter, I have  
given birth to a boy weighing ten  
pounds. I hope this will be satis-  
factory."

"This is my eighth child. What  
are we going to do about it?"

## CHAIN LIGHTNING!

## Dominion Bureau Of Statistics Gives Word On Marriage

(By Bob Blackburn in  
Ottawa Citizen)

The Dominion Bureau of Statistics  
has rallied round to give Canada's  
hopeless the Word on marriage.

In a 734-page tome on the Nation's  
hatched, matched, and despatched,  
the bureau devotes a section to mar-  
ital statistics of 1947 which prove,  
among other things, that most people  
marry unmarried people (which isn't  
as silly as it sounds) and that June  
is definitely The Month.

It shows that 21 is the most hope-  
ful age for would-be brides in every

province but Quebec, where it's 20,  
and New Brunswick, where it's 19  
and the birth-rate is highest in the  
land.

The tables prove that maritally  
speaking anyway British Columbians  
are our most erratic citizens and fin-  
ally that there is love among the  
Dukhobors.

A table on the marital status of  
brides and bridegrooms indicates  
that more than 90 per cent. of wed-  
dings are between bachelors and  
spinsters. But it also shows bache-  
lors prefer divorcees to widows.  
Widowers think it's a toss-up be-  
tween spinsters and widows but don't  
like divorcees. Divorced men prefer  
divorced women to widows. Spinsters  
prefer divorced men to widowers and  
so do divorcees.

But all, no matter what status,  
prefer a hitherto unmarried mate.

With one exception, marriage is a  
seasonal pastime. The rate rises  
from a chilly low in January to a  
boom in June, after which it skids  
evenly down again.

The exception is the month of  
March, which is the most ill-favored  
of the lot, possibly due to the im-  
minence of the income tax deadline.

As stated, the boom year for girls  
is 21, at which age they marry men  
from 18 to 64. One blushing bride  
of 27 was wed that year to a man  
over 80. It happened in—you guess-  
ed it—British Columbia.

The greatest number of men are  
ensnared between 20 and 24, with a  
peak at 22, but by the age of 40  
they are scoring considerably higher  
than women of that age. British  
Columbia does a brisk business in old  
age weddings.

New Brunswick is head and shoulders  
above the rest in the baby-pro-  
ducing game. With a birth-rate of  
36.2 to the thousand, it shames Quebec's  
31.1 despite that province's  
reputation for large families. Ontario  
just isn't in it. Its 26.0 is the  
lowest in Canada.

To get back to marriages, it is  
worth noting that almost all Duk-  
hobors who marry, marry other  
Dukhobors. The few that don't,  
marry Baptists, Mormons, Lutherans,  
Mennonites and members of the United  
and Roman Catholic Churches.

Overwhelmingly, members of a  
church marry those of their own  
faith, even in unrestrictive churches.  
Likewise, geographical proximity is  
a major factor, but, and you guessed  
it again, it seems to make less differ-  
ence in British Columbia than anywhere  
else.

## SCANDINAVIAN HISTORY

The Norns were the Fates of  
Scandinavian history. They were  
three young women who represented  
the past, the present and the future.

## On The Side : By E. V. Durling

What is the most trivial discussion you ever heard of taking up a lot  
of time in a court of law? Recently in a London court several hours were  
spent in the discussion of the following question: "What is the right way  
to sew a button-on a man's coat?" Expert witnesses were called to testify  
as to whether the button should be sewed on through the cloth, or so the  
cotton does not show in the back. The action was brought about by a  
man refusing to pay for a made-to-measure suit in which he alleged the  
buttons were not properly sewed on. The court finally decided that in  
sewing a button on a coat the cotton should not show in the back.

## Care To Count 'Em?

Brunettes have the thickest hair, blondes the thinnest. Blondes have  
the most hairs, averaging about 150,000. A blonde averages 110,000, a  
red-head only 20,000.

## Mothers-In-Law

How are you getting along with your mother-in-law? If things are  
not running smoothly try to do something about it. In any event don't  
start hating your mother-in-law. If you do you may get sinus trouble.  
Recently reported was the case of a man who had sinus trouble. He tried  
everything but rarely got relief. His mother-in-law lived with him. It  
suddenly occurred to him that the periods when he did get relief from his  
sinus trouble were when his mother-in-law was away on trips. He arranged  
to have his mother-in-law live elsewhere for a time. His sinus trouble  
disappeared. However, his physician told him the reason he got the sinus  
trouble was the emotional disturbance caused by his hating his mother-in-  
law. So, gentlemen, love your mothers-in-law and be free of sinus trouble.

## Fancy Bottles

Fancy bottles have a strong appeal to women. When buying perfume  
many women think more of the shape of the bottle than what it contains.  
It is a fact that one organization has put sea water in an unusually attractive  
bottle and sells lots of it. The bottle is labelled "Sea Water", and no  
claims are made for it as a beauty preparation. The ladies just think it  
helps decorate their dressing tables. One French perfume manufacturer  
recently stated that if he could put his product in a plain bottle he could  
sell it for half the present price and still make a nice profit.

## Visit To Lord Byron

Speaking of long week-ends, are you familiar with the record of the  
visit the poet Shelley made to Lord Byron's house in Italy? Shelley really  
had a trying week-end on that occasion. Of it he wrote in part: "Lord  
Byron's establishment consists, besides servants, of ten horses, eight enormous  
dogs, three monkeys, five cats, an eagle, a crow and a falcon and all these except the horses, walk about the house which every now and  
then resounds with their unarbitrated quarrels. I have just met on the  
grand staircase five peacocks, a guinea hen and an Egyptian crane."

## Forewarned And Forearmed

Some experts on the subject claim a young man seriously considering  
matrimony should make an extensive study of his intended bride's mother  
before taking the walk to the altar. They say if a girl's mother is an  
indifferent housekeeper her daughter will be likewise. Also that if at the  
age of 40 or thereabouts a mother has let herself go and become unusually  
plump, the daughter will look about the same at that age. One expert  
puts forth the interesting claim that a capacity for love is hereditary.  
That if a woman loves her husband intensely, her daughter will make an  
exceptionally affectionate wife. But that if a woman is the type who  
marries for security rather than love, her daughter will view matrimony  
in a similar manner.

—Central Press Canadian.

**WATANABE MATSUO SEN**, which reading from right to left, means Miss Matsuko Watanabe, paused briefly to add a Merry Christmas greeting to the holiday bulletin board at the Montreal Y.W.C.A. Miss Watanabe, who is executive secretary of the Tokyo Y.W.C.A., left recently for Toronto, continuing a journey that has brought her from India through several countries of Europe to Canada. Before returning to Japan in April, she will also visit in the United States. During the few days she has spent in Montreal, the visitor from Tokyo has been a frequent guest of the Montreal Association, wearing the traditional kimono, which, she says, has nearly disappeared from the everyday scene of city life in Japan. The flowing sleeves, and close folds of the graceful garment make it a thing of beauty, but a nuisance at work, and Japanese girls are more and more interested in jobs and careers. Western dress and western ideas—even western ideas of Christmas—are taking hold more strongly every day, Miss Matsuko said. Much of this influence has come from the occupation troops stationed throughout Japan, who brought with them their own ideas of how to enjoy the festive season.

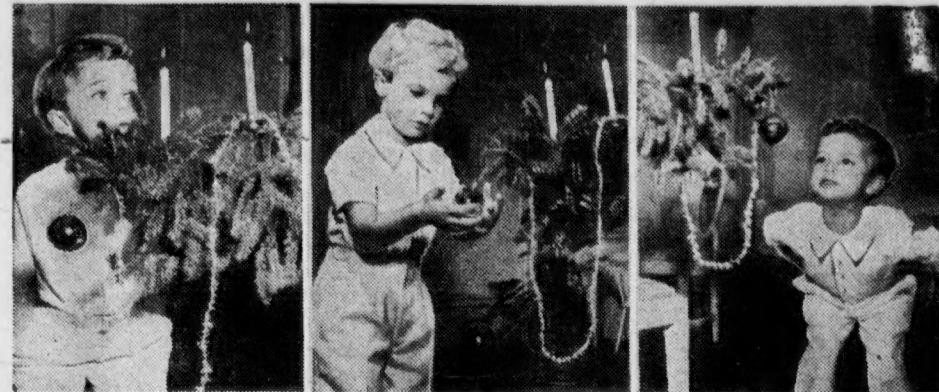

**SOLEMN CEREMONY AT VATICAN CITY**—Pope Pius XII kneels as he lays the first brick, symbolically closing the Holy Door of St. Peter's Basilica at Vatican City, in a solemn ceremony ending the 1950 Holy Year of the Roman Catholic Church. The Pontiff was the first to enter St. Peter's through the Holy Door last Christmas Eve, and the last to leave through the same door in the world's largest church this Christmas Eve. The ceremony marked the end of the church's 25th Holy Year.

—Central Press Canadian.

**POODLE IS PRESENT FOR ROYALTY**—Princess Fatima of Iran and her American husband, John Hillier, are shown at Orly airport just before they left Paris for Tehran to attend the wedding of the princess's brother, Shah Reza Pahlevi, to Narriman Sadek. They took the black poodle as a wedding present. The aristocratic pooch was selected from 129 dogs.

**LIKE ANY OTHER FOUR-YEAR-OLD YOUNGSTER** who's awed by a brightly-trimmed tree at Christmas time, Sweden's Crown Prince Carl Gustav admires the Yuletide tree in his nursery at the royal palace in Stockholm. Left, the young prince stares wide-eyed at lighted candles and trimmings, centre, he cups a bright ball in his hands, and right, he stands off to admire the shining ball.

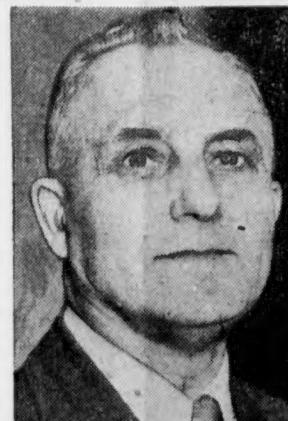

—Central Press Canadian.  
**MARRIAGE TO COMMONER IS SLATED FOR FEBRUARY**—Pictured in the uniform of Admiral of the Fleet, Egypt's colorful ruler, King Farouk, said to be contemplating marriage in the near future to 17-year-old commoner, Narriman Sadek, was recently reported to have placed an order in Turin for "the world's most luxurious train" to be used on a honeymoon trip in February. King Farouk, who ascended the throne at the age of 16, on the death of his father, King Fouad, in 1936, was married in 1938, but divorced his queen Farida, in 1948.

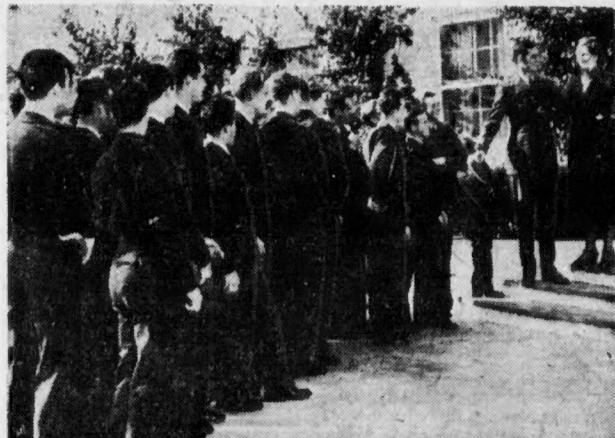

**JOE PETROFF**, second cook on the coastal freighter Bulkbarrier, peeked timidly out of the door of his cabin aboard the ship anchored in ice-covered harbor. Snow was falling heavily, covering the freighter's deck with a two-inch mantle of white. "Looks like a tough winter for us shipkeepers," Joe remarked, pulling his head back into the cozy cabin. "Snow on the deck so early is a bad sign." Joe, a little fellow with lots of shovelling muscles, is one of the many summer seamen who will spend the winter on the lonely, silent ships that came to the port of Montreal some weeks ago for the winter months.

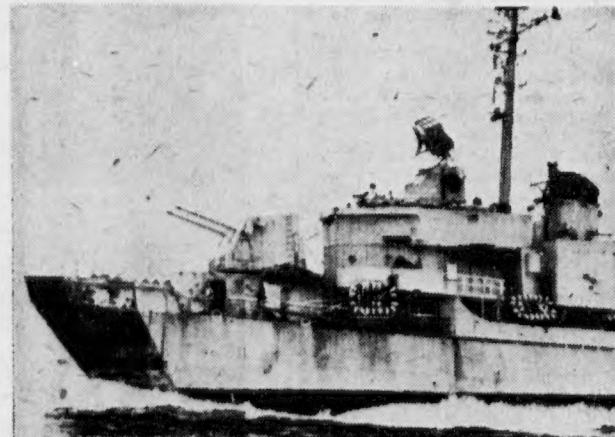

**DROWNING BOY SAVED**—Billy Pearson, seven-year-old Buckhorn, Ont., schoolboy, who fell through a bridge railing into Buckhorn lake and was rescued by Sam Woods, postmaster of the Peterboro county village. Billy was hauled out with a rope tossed by Bert Calvert of Lakehurst.

Hailed as a hero by every member of the community, Mr. Woods, 65, plunged into the icy lake and held Billy until he could be pulled out of the water. Lad was returning home from school when he fell into 10 feet of water.—Central Press Canadian.

—Central Press Canadian.  
**DIDN'T SAY HOW MANY** — Mrs. R. H. Shaddick of Miami, Fla., smiled that loving maternal smile when she received a letter from her son, John, an aviation cadet, telling her that he was coming home and that he was bringing "a few of the fellows" with him. But when John arrived with a "few of the fellows" she found that they were 38 air cadets from the Netherlands. She is being introduced to them here by her boy. However, warm-hearted Miamians sprang to the assistance of the badly outnumbered mother and provided rooms in many families for the Dutch boys. Now they have more party invitations than they can handle.

**BACK FOR FACE-LIFTING**—Wearing a bow that looks like a fugitive from a scow, the U.S.S. Mansfield heads for the Puget Sound naval shipyard to have her sleek beauty restored. The destroyer lost her nose when she struck a mine off the Korean coast. The temporary bow was installed at a Japanese shipyard to permit her passage across the Pacific for the restoration operation.—Central Press Canadian.

## The Sports Clinic

(An official department of Sports College)  
Conducted by Lloyd "Ace" Percival

### You Are What You Eat

Slightly less than two years ago, the Sports College Research Department began a survey of experts in physical education and medical research. The object of this study was to determine the most important factor in the development of peak physical fitness and mental efficiency. The answer, and it was almost unanimous, was "nutrition". In other words; what you eat.

Soon afterwards, Sports College began a second survey. This time we asked the athletic youth of Canada how and what it was eating, and we found that only one athlete in a thousand was following the rules of good nutrition as laid down by the experts in this field—a disturbing result, to say the least.

Although he depends completely on his body to carry out the commands he gives it, the average athlete does not supply it with sufficient high-grade fuel to ensure efficient operation. It is as if Harold Wilson tried to race his powerboat, "Miss Canada IV" on cigarette lighter fluid.

The idea that a person "becomes" what he eats has been proved scientifically. Therefore, it doesn't take much brainpower to figure out that the smartest play an athlete can make is at the dinner table. He must make sure he is eating properly. Coaches and parents should follow the same rule when planning the development of those in their charge.

The simple, natural foods provide the best possible fuel for the machine that is the athlete's body. Yet they were found to be present only in small quantities on the average diet sheet, with prepared, refined foods predominating. These foods have lost much of their original vitamin content, and provide a poor quality fuel that leaves an unhealthy residue. In addition, far too many athletes were eating too much fatty and fried food.

By far the greatest deficiency uncovered by the Sports College survey was in B Complex vitamins. These are the vitamins which create healthy nerves, sound digestion and high morale. They enable a person to get the maximum good from the food he does eat.

The average athletic diet showed other outstanding deficiencies—such important minerals as iron, calcium and phosphorous, all of which are vital in building sound, healthy bodies. Because an athlete depends on his body more than the average person, he must make sure that it has no weaknesses. Yet if certain dietary rules are ignored, weaknesses are sure to develop.

Members of the Sports College Testing Group, on which the effectiveness of various training techniques and conditioning methods are tested, have clearly demonstrated the importance of diet. Remarkable increases in efficiency were made in such sports as middle and long distance running, hockey, football, basketball and middle and long distance swimming, all of which involve hard physical activity and endurance. Experiments on this group indicated that when a change-over is made to an adequate diet, efficiency will increase as much as 40 per cent.

Sports College also tested the value of Yami Yogurt, and found that there is no other single food which can do so much for the athlete's all-round development. Yami Yogurt is a Bulgarian milk culture, at present obtainable only from the Roselle Institute in La Trappe, Quebec, but soon to be made available throughout Canada. It is a wonderful source of those important B Complex vitamins, and in addition, supplies tremendous amounts of Calcium, protein and Vitamin D.

As a nerve tonic and body-builder for athletes, Yami Yogurt is unequalled. Sports College also found that athletes troubled by "nervous stomach" and nausea before and during their event had almost no trouble after including Yami Yogurt in their diet. In addition, it is a quick source

### "Irene" Popular Song For 1950

NEW YORK.—The top popular song in the United States last year was "Good Night Irene".

Billboard magazine says the tune carried off top honors in its fifth annual poll on the basis of phonograph record sales and commercial record use.

Second on the list was "Mona Lisa", followed by the "Third Man Theme", "Harbor Lights", a couple of Bing Crosby-and-son specialties—"Sam's Song" and "Simple Melody"—and then "Bewitched", "Music, Music, Music", and "Chattanooga Shoe Shine Boy".

Q 9 8 6 3	♦ 7
♦ 6 4	Q 5
W.	A 6 4 3
♦ 10 8 3 2	J 9 8 2
♦ 10 9 6	♦ K J
♦ 1 A K 8 7 4	S.
♦ Q 5	♦ A K 10 5 4 2
♦ 3 2	♦ A 9 5

North-South have abundant Hearts, but a dearth of controls. The bidding at rubber Bridge, again at cautious opposition was One Heart—Two Hearts; Three Hearts—Four Hearts. If South decides to rebid, a trial bid of Three Diamonds is best; North will treat his three small Diamonds as a liability and signs off in Three Hearts. Over South's actual rebid North could not judge whether he held the right cards and had to bid Spades.

The defence started off with two Club tricks, and East then led ♦ 7. South's ♦ Q was later captured by West, and ♦ 3 was returned.

Hoping to discard a losing Diamond, South finessed ♦ 10 and ended up three down. East-West, however, could have made Four Spades.

### COAL OUTPUT DOWN

CALGARY.—Alberta's coal production for 11 months in 1950 was 7,216,969 tons, or more than half a million tons lower than a year ago.

### THIS CURIOUS WORLD

## Coyote Lives Where He Can Enjoy A Fight

From the Stettler (Alberta) Independent  
**C**OYOTES have been hunted in this district ever since the pioneers settled here in 1903 or even earlier. One of the first items in the Independent was that coyotes were bothering stock and poultry from Laramie to Leo, and even the women were on the lookout for them. On Christmas morning, 1906, Mrs. O. O. Porter of the Gough Lake country shot a coyote from her front door.

In fact the coyote has been hunted more than any other American animal. Every device and trick known to man has been used down the years, to eradicate him, yet this sly little wolf continues to hold his own. There must be around 200,000 right now in Canada alone, and it is said that there are over 2,000,000 in the United States.

The coyote is a free enterpriser. He could quite easily retire to the uninhabited parts of our vast northland and live in comparative peace, but that does not suit him at all. He delights in living among his enemies and matching his wits with theirs, and he enjoys a coyote hunt just as much as the hunting groups in our own district. He decides to live among his enemies because they raise the kind of food he prefers.

He is a scavenger in some respects as he picks up food anywhere, but he likes his food freshly killed, just as human beings do. He is the world's top buccaneer and he is always willing to take his chances against traps, poison, shot guns, rifles, airplanes or bombs, and he doesn't care a tinker's dam whether a coyote hunt is financed by a municipality, or by the government at Edmonton.

If the people of Alberta were real sports, they would admire the coyote instead of hating him. Here is a wild animal that has come up the hard way. He has no friends anywhere in the whole world. He can go without food or drink for days at a time. He has a body which is like a steel spring. He has a cunning meaning "knowingness" that puts the human brain to shame.

He is a first class animal in his own right, he can stand any degrees of low temperatures or of hunger and thirst, and he is a devoted husband and father.

The coyote is a yellowish gray animal, resembling a small German shepherd dog. He seldom weighs more than 30 pounds, but he is very

fast. His speed has been checked by an automobile at forty miles per hour. Scientists describe him as an inferior member of the wolf family, but he is not inferior in any respect, except in his small stature. His wits are so sharp that he thrives in regions where the big wolves become extinct.

A rancher or farmer walking or riding about his place without a gun may see several coyotes at close range. He takes his gun the next time but does not see a single animal. Some trappers say that the coyote's keen sense of smell detects the gun but this seems too fanciful. The coyotes have a sort of telegraphic sixth sense. At any rate they have something that man does not possess.

The coyote lives in a den dug into the hillside or under an overhanging rock. These dens seem to be hard to find as we never hear of our local hunters coming home with coyote pups. In most cases there are two dens, one for the mother and young, and the other for the father.

Coyotes breed once a year and produce litters of from four to ten pups. These pups are taken care of by their parents until they are a year old, when they are left to shift for themselves.

The coyote is God's creature and so he has his good points. The U.S. Wildlife Service has reported that the stomachs of 450 coyotes which were examined, showed that they had eaten 177 wild rabbits, and 137 miscellaneous rodents. So don't condemn the coyote to the last ditch. He keeps down the rodents and helps to preserve the balance of nature.

What can we as human beings learn from the unregenerate coyote?

1. The value of physical fitness. Man is an animal too, but he does not understand physical fitness in terms of the coyote. Perhaps the Indians had it or the earliest pioneers but not the men of the present day. The coyote is always fit because he has to be fit to escape annihilation. The female coyote does not need to reduce as she is always ready to run forty miles per hour or to fight for her young.

2. The value of a keen intelligence. In any situation the coyote knows just what to do on the spur of the moment. A farmer kept a tame young coyote tied up near his house and he fed him with scraps scattered in front of his kennel. The coyote waited until the chickens came up for the scraps and then pounced upon them, so that he had poultry as well as scraps for his meal.

3. The value of alert senses. Not only has the coyote developed his five senses to the highest degree, but he seems to have a sixth sense back in his sub-conscious mind.

### Mother Makes Good As Truck Driver

SALT LAKE CITY.—Mrs. Annie Crook of Tooele, Utah, thinks she is the only licensed woman truck driver in Utah.

She's licensed to handle any truck on the road.

The mother of three children, Mrs. Crook, is a former navy Wave and she holds truck driving licenses in California and Kentucky as well as Utah.

Mrs. Crook assures anyone that "I can handle anything on wheels."

### GEMS OF THOUGHT

#### BEHAVIOR

What a man does, not what he feels, thinks, or believes, is the universal yardstick of behavior.—Benjamin C. Leeming.

To be always thinking about your manners is not the way to make them good; the very perfection of manners is not to think about yourself.—Whately.

Men's behaviour should be like their apparel, not too strait, or point device, but free for exercise or motion.—Bacon.

Be civil to all; sociable to many; familiar with few; friend to one; enemy to none.—Benjamin Franklin.

Simplicity of manner is the last attainment. Men are very long afraid of being natural, from the dread of being taken for ordinary.

—Jeffrey.

Right motives give opinions to thought, and strength and freedom to speech and action.—Mary Baker Eddy.

THEY HAD A WHITE CHRISTMAS—An unusual Yuletide experience for Yorkshire, Eng., farms and villages was to be cut off from rail and highway service by snow drifts. Horses and sleds were put into service to supply residents with Christmas food and mail.—Central Press Canadian.

## Apple Pie With Cheese Still Favorite

By KAY REX

OTTAWA.—Apple pie with cheese has long been a family favorite, and now it's being pushed as the No. 1 Canadian dish.

At the Canadian tourist association convention in Calgary this fall the Canadian cuisine committee suggested that apple pie with Canadian cheese is due for a bit of promotion. "As mediocre as it may be in some food establishments, it is still Canada's number one favorite," says the committee report. "Let's resolve to make and serve better apple pie in Canada."

Suggestions from the year-old committee are directed particularly at the public catering industry. But it behooves the rest of us to take note of such recommendation.

This is particularly so right now with cheese and apples heavy on the market—waiting to be bought by the Canadian consumer.

The apple crop may be a little below last year's huge one of 18,000,000 bushels and cheese production down somewhat from 1949. But there's still plenty for all.

Home economists of the agriculture department's consumer section remind that each variety of apple has a definite season when flavor and texture are at their best.

December and January are the months to ask for fall varieties such as McIntosh, Baldwin, Northern Spy, Golden Russet and Winesap. In fact the latter is good right through from December until May.

Northern Spy is best for both eating and cooking. Golden Russet is an eating apple. Another variety at its peak right now is the Rome Beauty—good for cooking but only fair eating.

Steamed apple pudding is an excellent way to treat the family to apples.

Ingredients: six apples; one-third cup sugar; one cup all-purpose flour; two teaspoons baking-powder; one-half teaspoon salt; one-half cup milk, two tablespoons shortening.

Pare, core and slice apple into a buttered double boiler. Add sugar. Mix and sift the dry ingredients, cut in shortening and add the milk. Spread the dough over the apples. Steam 35 minutes. Turn out to serve. Six servings.

## Helpful Hints

Don't carry so many bundles that you can't see over them, especially if you're going up or down stairs. Play safe and make two trips.

Liver, kidney, dried beans, cereals, fish and dried fruits are all sources of the iron that you need for good red blood. They should be eaten regularly.

Don't stir paint around and around in the can to mix it properly. Use a flat paddle and start with the end of the paddle at the bottom of the can; then bring it up through the paint with a twisting, turning motion.

To test varnish or shellac to determine whether or not they will darken finish or impart color to clear wood, pour a small quantity over clear glass. If either varnish or shellac shows an amber quality it will darken any finish slightly, and will also impart its color to clear wood.

## T.B. Death Rate Lowest Ever Recorded

The tuberculosis death rate in Canada for 1949 was 30.4 per 100,000. This is the lowest rate ever recorded in our country.

All provinces had reductions in their T.B. death rates. The provincial rates in ascending order were as follows per 100,000:

Ontario	15.6
Saskatchewan	21.5
Prince Edward Island	23.4
Alberta	24.2
Nova Scotia	28.5
Manitoba	28.9
British Columbia	36.4
New Brunswick	37.8
Quebec	48.3

Newfoundland is not included in the 1949 statistics because it was not a part of the Dominion during the whole of the year.

The above rates are based on a total of 4,010 deaths of which 1,794 were women and 2,216 men.

Though T.B. kills more men than women in Canada, the ten-year age group with the largest number of deaths is women of 20-29 inclusive, in which there were 415 deaths. This does not mean, however, that the rate was highest in this group because it is a very large one. The highest rate was actually among men 60 to 69 inclusive, where it was 77 per 100,000, more than twice the average.

All provinces in Canada have been carrying on mass X-ray surveys in an effort to find as many cases of tuberculosis as early as possible. There can be no doubt that the percentage of cases found and treated promptly is increasing steadily, and that there is a corresponding increase in the percentage of cases which are cured. When a case is discovered before symptoms appear the chances of recovery are more than nine out of ten.

Early discovery of cases pays dividends in every direction. The patient's chances are improved, so it is better for him. The length of treatment needed is shortened, which lowers the taxpayer's bill. The time off the job is shortened so that the earlier a case is found and treated the less financial hardship the family will have to endure.

The earlier the disease is found and the patient treated, the less the danger of infection. The disease becomes more infectious as it advances, and is therefore more dangerous unless the patient is under treatment where every precaution is taken against his infection being carried to others.

There are about 17,000 patients in Canadian sanatoria.

### 70-YEAR-OLD CLIMBER

BROOKLINE, Mass.—To find out for himself whether the weather vane atop the 150-foot church tower needed repairs, 70-year-old parishioner Charles A. Newhall of the Second Church Unitarian climbed up and took a look.

"It was a pushover," said Newhall, who for 50 years has been a member of the Appalachian Mountain Climbing Club.

## : Selected Recipes :

### Pineapple Cream Cake

One half cup butter, 1½ cups sifted flour, baking powder and salt; add alternately with water. Beat pineapple, with juice; 2½ cups sifted cake flour, 2½ tsp. double-acting baking powder, ½ tsp. salt, ¼ cup water, 3 eggs, separated, 350 degrees F., 35 to 40 minutes.

Cool. Fill and top with Golden Whipped Cream.

Cream butter. Add sugar gradually while continuing to cream.

Garnish with bits of drained crushed pineapple.

## OUR COMPLETE SHORT STORY

## : LOVE IS DIFFERENT :

By Hilda W. Caulfield

Dot's Little World Had Gone Awry In Some Manner She Couldn't Understand.

RON CAMERON'S eyes followed his wife's graceful figure as she danced with their friend, Bob Lawson. Bob was a doctor and had known Ann long before Ron had met and married her. In fact Ann had been Bob's special nurse.

Ron was remembering all this as he watched them. They were the handsomest couple on the floor, Ann tall and fair, her golden hair and delicate coloring taking on an almost ethereal quality under the glare of the lights.

Ron thought, miserably, that he should be proud of his wife, but he was only unhappy as he sat at their secluded table for four. Opposite him sat Bob's wife, Dot. Unlike Ann, she was little and dark. Suddenly Bob felt he was neglecting her.

"Dance, Dot?" he asked, rising. "Thanks, Ron," she replied quickly. "If you don't mind I'd rather sit and watch."

"Oh, dear, that was the wrong thing to say," she thought hopelessly as Ron sat down again. "Lately I am always doing and saying the wrong things."

It was true enough. Dot's little world, made so happy by Bob's devotion, had gone awry in some manner she couldn't understand. Everything seemed as perfect. Bob was just as devoted; Ron and Ann were just as kind to her. Yet, it was Ann, she had to admit, Ann so lovely and so necessary to Bob's work.

The Camerons were away on holiday when Bob and Dot were married. Dot hadn't known them till their return but she liked them right away. They would complete the perfect foursome. But that was before she knew about Ann; before she had seen the fair head and the dark one bent over hospital plans; before she had felt an outsider in the face of their absorption over professional problems. Now she seemed to be always watching Ann and Bob. That was why she had made that stupid remark just now to Ron.

Ron saw the flush on her cheeks.

## Fashions

## So Little Fabric!

Save dollars! Sew these new separates! ONE yard 54-inch for weskit, ONE yard for skirt in all sizes given! Sew TWO new wonderful separates to mix and match. Belt-slots on skirt, flaps on weskit are news. Pattern 4508; sizes 12, 14, 16, 18, 20.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Jet pilots call the engine throttle control the "go handle". 2915

## 1950 Flax Crop Oil Yield High Despite Frost

WINNIPEG.—About 60 per cent. of the 1950 flax crop is grading tough and damp but quantity and quality of oil in the dry seed are excellent, according to a report released by the board of grain commissioners' laboratory.

Average oil content of 42.8 per cent. in this year's crop is equal to the highest obtained in 16 previous crops. Drying quality of the oil is highest on record.

Current flax crop of about 4,000,000 bushels is twice as large as that of 1949, and shows 85 per cent. of carlots inspected entering the top grade.

The laboratory report cautions farmers against using frozen flax for feeding livestock. Commercial linseed meal is recommended as safe feed since it has received heat treatment in crushing plants.

Samples from 182 stations in Manitoba, 69 in Saskatchewan and 22 in Alberta formed the basis of the report.

## Woman Mayor Quits Northern Town

VANCOUVER.—Mrs. Sadie Young has left Stewart, B.C., where the summer days are 22½ hours long and the cabbages grow so big that a single one fills a wheelbarrow.

She has spent 40 years in British Columbia's northernmost port and for the past year has been mayor of Stewart.

The only mementos she brought south with her were a beaverskin coat, 20 years old, a silver nugget, a box of perfumery presented by the Canadian Legion, a silk scarf presented by legionnaires of neighboring Hyder, Alaska, and a rose from her garden.

"The rest of the souvenirs are all in my mind," says Mrs. Young. She is 72 and has come to Vancouver to retire.

She went to Stewart in 1910 during the gold rush. The population was 10,000. Today it is 300.

"It's beautiful in the summer," she says. "There's only about 1½ hours of darkness and robins sing at two in the morning."

In early Roman times, the color yellow was used only for bridal garments.

## WESTERN BRIEFS

## Seek Farm Helpers

PRINCE ALBERT, Sask.—Saskatchewan will seek 300 single male and 100 single female farm helpers from among displaced persons coming to Canada in 1951, the national employment service here said.

## Must Pay Full Rate

WINNIPEG.—Winnipeg General Hospital notified municipalities it will end its special \$3-a-day rate for indigent patients. It told municipalities that after Jan. 1 it will admit indigent patients only if the municipalities can pay full cost of the care, which is \$6 a day.

## Gets Two Years

KAMLOOPS, B.C.—Donald Folsom, 20, of Lestock, Sask., has been sentenced to two years for "armed" robbery in the toy-gun holdup Dec. 16 of Bailey's Grocery at Kamloops. The robbery netted less than \$100 and part of the money was recovered when he was arrested on a downtown street the next day.

## Building Record

EDMONTON.—Building permits totaling a record \$46,579,372 had been issued when the books were closed at the city building department for 1950. Previous record was \$40,050,063 in 1949.

## Buys Red Deer Site

RED DEER, Alta.—Canadian Safeways Ltd. has agreed to buy from the city of Red Deer a business site in the heart of the city for \$38,000. The 2.47-acre site now is occupied by the Red Deer Arena, which will be torn down or moved.

Trans-Jordan became an independent country in 1946, when Britain gave up its mandate.

## Itch...Itch...Itch

## I Was Nearly Crazy

Until I discovered Dr. D. D. Dennis' amazingly fast relief, Dr. D. D. Prescription, World popular, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by acne, pimples, rashes, allergies, foot or other skin trouble. **Now's the Time to Take Stock of Your Investments**

1950's stock market prices are history. But what may be ahead in 1951 is a matter requiring careful analysis. Prophecy is dangerous. That is why the present is the best time to "take stock" of your investments and consider prospects for the year ahead. A careful analysis of your holdings made now will place you in a position to estimate with increased confidence what the future holds in store for them.

If you will send us confidentially a list of your holdings, our Research department will analyse it, forward an up-to-date commentary upon each security, and make suggestions that seem advisable in the light of 1951 prospects. No obligation is implied or involved by asking for this analysis.

**LITTLE NEWS ITEMS  
OF LOCAL INTEREST**

Mr. and Mrs. Morris Switzer were weekend visitors with relatives in Calgary.

Mr. and Mrs. Ernst Ratzlaff of Acme have taken up residence in the house formerly occupied by Mr. and Mrs. Wilf Skerry. Mr. Ratzlaff recently accepted a position at Wright Motors. Mr. and Mrs. Skerry are now residing in the Charlie Martin house on the "island."

Born in Drumheller hospital to Mr. and Mrs. Jack Barber on Monday, January 22, a daughter, Wendy Joy.

Alex R. McTavish, R.O., Graduate Optometrist, will visit Shaw's Drug Store, Carbon, on Monday afternoon, January 29. Complete, dependable eyesight service.

USE THE CLASSIFIED ADS 11

Mr. and Mrs. Earl Ohlhauser were weekend visitors in Drumheller at the home of Mrs. Martha Ohlhauser.

Pope Lease W.I. held a successful whist drive at Beveridge Lake school Friday, January 19. Mrs. Jim Bacon and Mrs. E. Grenier were in charge of the entertainment. Ladies' first prize was won by Mrs. Earl Fraser, with the consolation going to Mrs. Harry Church. Men's first prize went to Mr. McKellar and the consolation to Archie McKinnon. Following whist lunch was served by members of the W.I.

Carbon lost to Newcastle by a 7-6 score in a hockey game played at Carbon Sunday afternoon. Carbons scorers were Joe Appleyard, Jim Foster, Bill Heath, Marshall Semenchuk, Walter Martin, John Buchner.

Carbon lineup — Goal, Dusty Poxon; defense, Lindsay Hay; Roy Kary, Wray Wright, Dale Poxon, forwards, Jim Foster, Bill Heath, Walter Martin, Oscar Gackle, Reg Heath, John Buchner, Marshall Semenchuk, Joe Appleyard, Jack Appleyard, Archie Goudie.

Gordon Pugh of Drumheller was a weekend guest at the home of Mr. and Mrs. Walter Hay.

**Coming Events**

The Drumheller Health Unit will hold a Well Baby and Pre-School clinic in the United Church hall on Monday, February 5th, from 10 a.m. to 12 noon.

A meeting of Carbon F. U. A. Local No. 1005 will be held in the Legion hall Monday evening, February 5, at 8 p.m.

The Gamble Ladies' Aid will meet at the home of Mrs. Victor Luft at 2,30 p.m. on Thursday February 1.

There will be a Girls' Club meeting at the home of Mrs. Jack Barnes on Tuesday, January 30, at 7.30 p.m. All members are requested to attend.

**CARD OF THANKS**

I wish to extend my sincere thanks to the Ladies' Aid of the United Church, the Duke of York Chapter I.O.D.E., and the teachers of the Carbon school for their Christmas gifts and messages of goodwill. Also to Mr. Spry, who so kindly took care of the United Church and visited me every day; to the members of the Carbon Lions Club, who took care of the Scout Hall; to the Charlebois family for their kind help; and to all our friends who brought us chickens, home cooking, fruit, honey, soups and juices; and to Dr. McFarlane and my wife for their kind attention and care during my recent illness.

**Personal Planning**

HERE'S WHAT PEOPLE ARE SAYING ABOUT  
**Personal Planning**

The B of M featured Personal Planning on a test basis at the Canadian National Exhibition last autumn. In two weeks, 27,000 people asked for a copy of the B of M's booklet on Personal Planning. Here are some of the comments these people have volunteered:

"A very workable budget. Your service is appreciated."

"... wish we had started the plan long ago."

"Thank you so much for showing us the way to make a budget work. Have tried for a year with no success, but now I think we can really live and save with Personal Planning."

"The best yet."

"... appreciate commonsense method of handling money."

"Swell idea."
